PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of hands-on experience specializing in React.js, TypeScript, Redux Toolkit, and RTK Query to build scalable, high-performance web applications, responsive UIs, and admin dashboards. Experienced in full-stack development with recent contributions to backend using Java and Spring Boot, including REST API design, CRUD operations, and MySQL integration. Proven in Agile environments with strong focus on clean code, performance optimization (achieving 30% page load time improvement via lazy loading and memoization), API integration, JWT authentication, and role-based access control.

PROFESSIONAL EXPERIENCE

Software Developer – React & Spring Boot

Uzvi Services | Vijayawada, Andhra Pradesh Nov 2022 – Present

- Designed and developed large-scale React.js + TypeScript applications for government portals, CRM platforms, e-commerce systems, and admin dashboards serving thousands of users.
- Led frontend architecture and UI development for UZVIS E-Commerce platform, implementing reusable components, optimized multi-step checkout workflows, dynamic product pages, and Google Maps API integration for address selection and geocoding.
- Built secure, role-based systems with User, Admin, Management Admin, and Super Admin access levels using JWT authentication and role-based routing/UI authorization.
- Developed responsive dashboards, forms, tables with filters/sorting/pagination, task/complaint management workflows, and data-driven interfaces for public service and government platforms.
- Integrated REST APIs using Axios; optimized state management with Redux Toolkit and RTK Query for caching and scalable data fetching.
- Improved application performance through lazy loading, memoization, image optimization, caching, and reusable component patterns, achieving up to 30% faster page load times.
- Collaborated with backend teams during PHP-to-Java API migration to ensure seamless frontend compatibility and performance.
- Contributed to full-stack development in Apartment Management System: Designed and implemented RESTful APIs using Java Spring Boot with JDBC and MySQL for resident onboarding and visitor management modules, including CRUD operations and validation logic; integrated self-developed backend APIs with React frontend using Redux Persist for persistent sessions.
- Worked in Agile/Scrum with sprint planning, daily stand-ups, code reviews, requirement analysis, and technical discussions to deliver production-grade solutions.
- Implemented input validation, request handling, and structured error responses in Spring Boot APIs

KEY PROJECTS & RESPONSIBILITIES

- **UZVIS E-Commerce Platform (Nov 2022 – Feb 2025):** Full-scale React.js frontend with Vite, TypeScript, Axios, Google Maps API; supported Java API migration.
- **MOEAP Energy Management System (Mar 2025 – May 2025):** Secure role-based React.js application with JWT, multi-level dashboards, and task workflows for Ministry of Energy, Andhra Pradesh.
- **TG Bharath Citizen Request Management System (Jul 2025 – Oct 2025):** Citizen service portal with React.js, TypeScript, Tailwind CSS, JWT; included multi-step signup with OTP, admin panels, and RBAC.
- **Citizen Connect CRM Platform (Oct 2022 – Nov 2025):** React.js engagement platform with grievance tracking, notifications, community features (events/polls), and AI Assistant UI.
- **Apartment Management System (AMS) Admin Panel (Dec 2025 – Present):** Full-stack project using React.js, Redux Toolkit, RTK Query, Tailwind CSS, Java Spring Boot, MySQL; developed secure admin features, real-time analytics, and backend modules for residents/visitors.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, RTK Query, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, Component-Driven Architecture, Lazy Loading, Memoization, Axios, Vite

Backend: Java, Spring Boot, JDBC, REST API Development, CRUD Operations

Database: MySQL

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC)

Tools & Others: Git, VS Code, Postman, API Integration, Agile/Scrum, Performance Optimization

ACHIEVEMENTS

- Delivered multiple production-grade applications across e-commerce, government portals, CRM, and admin dashboards used by thousands of users.
 - Led frontend development for high-traffic platforms including UZVIS E-Commerce and citizen service systems.
 - Improved page load times by 30% through UI optimizations, caching, and reusable components.
 - Contributed to full-stack features in ongoing projects, bridging frontend and backend for end-to-end solutions.
-

DEVELOPMENT METHODOLOGIES & COLLABORATION

- Agile & Scrum.
 - Cross-functional Collaboration.
 - Code Reviews & Clean Code.
 - Requirement Analysis & Technical Discussions.
-

PROFESSIONAL ATTRIBUTES & WORK ETHIC

- RESTful API design principles
 - Client-server architecture.
 - State management patterns.
 - Authentication & Authorization flows.
-

EDUCATION

- Bachelor of Computer Science | 2017 – 2020
Sree Vidya Degree College, Krishna University, Vijayawada, AP
CGPA: 6.5 / 10
 - Class 12th | 2017
Sree Vidya Jr College, AP Intermediate Board – 60%
 - Class 10th | 2015
A.K.T.P. M.C High School, AP SSC Board – 80%
-
