PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building scalable, high-performance web applications using React.js, TypeScript, Redux Toolkit, RTK Query, and modern UI frameworks. Proven expertise in component-driven architecture, role-based access control (RBAC), admin dashboards, REST API integration, and performance optimization. Experienced in delivering government portals, CRM systems, e-commerce platforms, and apartment management systems. Strong focus on clean code, responsive design, performance tuning, and user-centric interfaces.

PROFESSIONAL EXPERIENCE

Uzvi Services – Vijayawada, Andhra Pradesh

Frontend Developer | November 2022 – Present

- Designed and developed large-scale React + TypeScript applications for government portals, CRM platforms, e-commerce systems, and admin dashboards.
- Led frontend architecture and UI development for UZVIS E-Commerce, implementing reusable components and optimized checkout workflows.
- Built role-based systems supporting User, Admin, Management Admin, and Super Admin access.
- Developed responsive dashboards, forms, and data-driven interfaces for public service and government platforms.
- Integrated REST APIs using Axios and optimized state management with Redux Toolkit & RTK Query.
- Improved application performance using lazy loading, memoization, caching, and reusable component patterns.
- Collaborated closely with backend teams during PHP-to-Java API migration to ensure seamless frontend integration.

KEY PROJECTS & RESPONSIBILITIES

1. UZVIS Web Application (E-Commerce Platform)

Client: Uzvi Services | Duration: Nov 2022 – Feb 2025

Tech: React.js, TypeScript, Vite, Axios, Google Maps API, PHP APIs, Java APIs

Project Description: Developed a full-scale e-commerce frontend application with dynamic product pages and a multi-step checkout flow.

- Built mobile-responsive UI using reusable, component-based architecture.
- Implemented multi-step checkout flow (address, payment, order summary).
- Integrated Google Maps API for address selection and geocoding.
- Supported backend API migration from PHP to Java, ensuring compatibility and performance.
- Enhanced performance using lazy loading, image optimization, and memoized components.

2. MOEAP Energy Management System Web Application

Client: Ministry of Energy, Andhra Pradesh | Duration: Mar 2025 – May 2025

Tech: React.js, TypeScript, JWT, Role-Based Routing

Project Description: Developed a secure, role-based energy and task management system.

- Built multi-level dashboards with tables, filters, sorting, and pagination.
- Implemented JWT-based authentication and role-based UI authorization.
- Developed task and complaint management workflows.
- Improved performance using reusable components and lazy loading techniques.

3. TG Bharath – Citizen Request Management System

Client: Government of Andhra Pradesh (Kurnool) | Duration: Jul 2025 – Oct 2025

Tech: React.js, TypeScript, Tailwind CSS, JWT

Project Description: Built a citizen service portal for managing public service requests.

- Developed citizen dashboards and multi-step signup with OTP validation.
- Built admin panel with advanced filters, search, and real-time statistics.
- Implemented role-based access control (User, Admin, Management Admin, Super Admin).
- Ensured fully responsive UI across desktop, tablet, and mobile devices.

4. Citizen Connect – Citizen Engagement & CRM Web Application

Client: Uzvi Services | Duration: Oct 2022 – Nov 2025

Tech: React.js, TypeScript, Vite, Tailwind CSS

Project Description: Developed a CRM platform focused on citizen engagement and service management.

- Built grievance and request management with status tracking and history.
- Implemented secure authentication (login, signup, forgot password).
- Designed centralized dashboards with notifications and quick actions.
- Integrated community features including events, polls, and announcements.
- Added AI Assistant UI to enhance service navigation and user experience.

5. Apartment Management System (AMS) – Admin Panel

Client: Uzvi Services | Duration: Dec 2025 – Present

Tech: React.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS

Project Description: Developing a full-featured admin panel for apartment and society management.

- Developed secure admin panel with JWT authentication and persistent sessions using Redux Persist.
- Implemented role-based workflows for residents, billing, complaints, amenities, and approvals.
- Built real-time dashboards and analytics for occupancy, service requests, and financial insights.
- Implemented billing and accounting modules with automated bill generation and payment tracking.
- Designed multi-step system setup flows for society configuration and global settings.
- Used Redux Toolkit & RTK Query for scalable state management and API caching

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux, Redux Toolkit, RTK Query, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Core Java, JDBC, Spring Boot (Beginner)

Database: MySQL

Tools & Platforms: Git, VS Code, Postman

Others: REST APIs, Axios, Responsive Design, Component-Driven Architecture

CERTIFICATIONS / ADDITIONAL TRAINING

- Completed training in Core Java, JDBC, Hibernate, Spring, and Spring Boot (2025)

ACHIEVEMENTS

- Delivered multiple production-grade applications across e-commerce, government portals, CRM systems, and admin dashboards.
- Led frontend development for UZVIS E-Commerce and citizen service platforms used by thousands of users.
- Built admin and analytics dashboards for government systems including MOEAP and AMS.

- Improved application performance through UI optimization, caching, and reusable components.

PROFESSIONAL ATTRIBUTES & WORK ETHIC

- Strong focus on UI/UX and responsive design.
- Expertise in scalable, component-driven frontend architecture.
- Excellent debugging, problem-solving, and performance optimization skills.
- Fast learner with strong clean-code practices and team collaboration.

EDUCATION

Bachelor of Computer Science | 2017 – 2020

Sree Vidya Degree College, Krishna University, Vijayawada, AP

CGPA: 6.5 / 10

Class 12th | 2017

Sree Vidya Jr College, AP Intermediate Board – 60%

Class 10th | 2015

A.K.T.P. M.C High School, AP SSC Board – 80%

DECLARATION

I hereby declare that all the above information is true and correct to the best of my knowledge and belief.
